

The African People's Socialist Party is Coming!

The future now belongs to the African workers and poor people!

African revolutionaries and socialists from across the world are scheduled to travel to Sierra Leone to witness a groundbreaking historic ceremony with the launching of the African People's Socialist Party (APSP) of Sierra Leone.

The APSP will be the first official revolutionary socialist party to be formed in the history of Sierra Leone by African workers and peasants as part of efforts to advance a struggle for control of state power in the country.

The event is scheduled to take place from November 16-18, 2009 in Freetown, Sierra Leone and is expected to bring together socialists, progressives and political activists from across Sierra Leone into a national consultative conference to discuss the need for socialism in the country and launch the African People's Socialist Party as a party of the workers and peasants.
